

PPL-9294 Folding Pen Digital Thermometer

- Probe Hinges to Turn Thermometer On
- Probe Folds Away for Storage and Turns Off
- One Hour Automatic Power Off
- 133mm Stainless Steel probe
- Max/Min Memory Recall Function
- Temperature Unit Selectable (°C/°F)
- Display Hold Function
- 1 Second Response Time
- Low Battery Indicator
- Low Cost
- Easy to Use
- Our stock unit has a White case

The PPL-9294 digital thermometer is designed for use in the food and catering industry in the preparation and storage of food. The wide measuring range makes it suitable for chilled and cooked foods and the practical design makes it easy to use and carry. The probe folds open and closed turning the thermometer on and off and whilst closed is protected preventing damage. The fast response probe allows measurements to be taken quickly ensuring that this most important of tasks is carried out with the minimum of delay. The thermometer is held in stock for immediate dispatch.

OPTIONAL EXTRAS

- Calibration—We offer a full calibration service traceable to UKAS standards to your requirements. Delivery is generally just a few days.
- Probe Wipes—Hygiene is also extremely important in food preparation and we can help you maintain this. Ask about our probe wipes to prevent cross contamination.
- Temperature Record Books—You are required by law to keep a record of your temperature measurements. Ensure you meet the current legislation by using our Record Books designed solely for this purpose.
